

```

CREATE TABLE Product (
    Product_id      varchar(20)  CONSTRAINT pk PRIMARY KEY ,
    Product_name    varchar(20)  CONSTRAINT notnull NOT NULL ,
    Price           Number       CONSTRAINT positive CHECK (Price > 0)
);

```

```

CREATE TABLE Customer (
    Customer_id      varchar(20)  CONSTRAINT pk PRIMARY KEY ,
    Customer_name    varchar(20)  CONSTRAINT Cname NOT NULL ,
    Customer_tel     Number
);

```

```

CREATE TABLE Order (
    Customer_id      varchar(20)  CONSTRAINT fk1 FOREIGN_KEY ,
    Product_id       varchar(20)  CONSTRAINT fk2 FOREIGN_KEY ,
    Quantity         Number
    Total_amount     Number
);

```

1/Add a column Category (VARCHAR2(20)) to the PRODUCT table

```
ALTER TABLE Product ADD Category VARCHAR2(20);
```

2/Add a column OrderDate (DATE) to the ORDERS table which have SYSDATE as a default value.

```
ALTER TABLE Order ADD OrderDate DATE DEFAULT SYSDATE;
```
